Facial Dermal Filler Treatments

Whether you are looking for full face rejuvenation or want to make subtle changes, the correct use of Dermal Filler can optimise your results.

About Face Medical Clinic

Face Medical Clinic is run and owned by Deborah Vines. Deborah has specialised in Aesthetics since 2002, is a Registered Independent Nurse Prescriber and founded the clinic in 2005.

Face Medical is possibly the longest established Aesthetics Clinic in the North West and gained its CQC (Care Quality Commission) Registration in January 2019.

Deborah and Kate, who is also a Registered Independent Nurse Prescriber only use Dermal Fillers from the Juvéderm® Vycross range, which are ethically sourced from an official Allergan approved pharmacy.

The Clinic is dedicated to continued professional development and ongoing advanced training. We comply with all Nursing and Midwifery Councils' ethical and educational guidelines, and also attend regular training by Allergan Faculty updating techniques and the Mauricio de Maio MD codes.

We always advise to have an initial consultation which is free and non obligatory, where the best treatment options are discussed and the cost of the treatments is advised.

What are dermal fillers?

Dermal Fillers are a highly effective anti-ageing treatment used to restore volume loss that can occur with ageing.

Dermal Fillers help to smooth the appearance of fine lines and deeper folds, as well as to shape and contour facial features.

Most Dermal Fillers are made from Hyaluronic acid. Hyaluronic acid is a naturally occurring sugar found in the body. The Hyaluronic acid in Dermal Fillers combines with the water in your skin to gently restore elasticity and tone.

As we age we lose Hyaluronic acid. This can lead to lines, wrinkles and loss in volume which causes the facial shape to change.

At Face Medical we use the world's number one brand of Dermal Filler; Juvéderm®.

 **Juvéderm®**

Juvéderm® blends with the tissue under the skin to keep you looking like yourself, whether you are laughing, smiling or frowning.

Dermal filler treatment areas

Within the Juvéderm® Vycross range there are different products specifically designed to treat certain areas of the face. Please see which areas we can treat as well as the cost and product type for each area.

A - Temples

Combination Treatments

When it comes to achieving the results you really want, a combined treatment approach is often the best way. At Face Medical Clinic we have taken some of the most popular treatment areas and created packages designed to give you the results you are looking for.

the lower FACE lift

Address one of the common signs of ageing by creating structure to strengthen and define the jawline, and lift sagging jowls.

£725 saves you £155

the mid FACE lift

Replacing volume to your mid-face will lift and define your cheeks as well as softening the nose to mouth lines. This combination will leave you looking and feeling rejuvenated.

£725 saves you £155

the FACE lift (7 point shape lift)

It's all about the shapes! The 7 Point shape was created by Dr Mauricio de Maio - one of the world's most famous surgeons - to add curves and definition to the mid-face, as well as providing angles and sculpting the lower face.

£895 saves you £425

the FACE finishing touches

Refresh your skin and smooth out those fine lines around your eyes, forehead, nose and mouth.

£525 saves you £140

If you are looking for something a little more bespoke, then why not consider our D'vine combination treatment programmes. Just ask a member of our team and we will be able to tailor-make something for you during your consultation.

At Face Medical we use
the world's number one
brand of Dermal Filler

 *Juvéderm*[®]

Dermal filler frequently asked questions

Will the treatment hurt?

No. Juvéderm® Dermal Fillers contain lidocaine which helps to numb the area and make the treatment more comfortable.

How Long will treatment last?

It depends on the area that we treat and the Juvéderm® product we use. This can be anything from 6 months for single area treatments and up to 2 years for full face combination treatments.

Will People know I have had treatment?

Not unless you want them to know! The products we use are designed to integrate with your tissues to give you a natural result. Coupled with our advanced techniques, you can be reassured that you will look and feel better - but no-one will know why!

How do I know what dermal filler treatment is right for me?

Although there may be a specific area of your face that you're looking to refresh or enhance, many patients benefit from treating multiple areas in combination to get the desired look. This holistic approach is often more natural and will optimise your results.

Our experts at Face Medical will work with you to identify the right treatment for you. During your consultation we will assess your face and create a treatment plan according to the results you would like to achieve.
